

Virginia United Football Club

LOCATION
Nundah, Queensland

ARCHITECT
Ausco Modular

TIMEFRAME
10 weeks

NUMBER OF MODULES
13

Virginia United Football Club inspires and motivates the local community to be active, have fun and challenge themselves through football for over 50 years, needed a modern-day facility to meet the current needs of their members.

A new facility was required, however the existing building footprint meant there was no easy site to locate the new building.

Ausco worked with the club to meet the council's rigorous requirements. Upon further investigation it was determined that the new purposed site was on contaminated land and a distance away for crucial infrastructure needs to connect the facility.

In February 2020 Ausco was engaged to design, manufacture and install the facility. Their new clubhouse now has sufficient change rooms, that are female friendly, accessible toilets, canteen with kitchen, office space, referees' room a social/spectator viewing areas with full length verandas and ample storage. The clubhouse is multi-dimensional to support their holiday camps, training and education.

Ausco's architectural capabilities in design and engineering, along with our ability to project manage large scale construction means that we can provide services from conception right through to completion. From formal contract award to handover was a mere 10 weeks.
